### **DETAILED ACTION**

This application is in condition for allowance except for the following formal matters:

#### ***Specification***

1. The abstract is objected to because it exceeds 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. Correction is required.

#### ***Drawings***

2. Figure 1 should be designated by a legend such as --Prior Art-- as defined in page 5 of the present specification. See MPEP § 608.02(g).
3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “at least two elongated tubular members” and “an electrical power source” in claim 1, “a controller” in claim 17, and “at least three substrates, each substrate having a plurality of light emitting devices” in claim 22 must be shown. No new matter should be entered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief

Art Unit: 2821

description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance

***Reasons for Allowance***

4. Claims 1-27 would be allowable if the specification and the drawings are rewritten or amended to overcome the objections, set forth in this Office action.
5. The following is a statement of reasons for the indication of allowable subject matter:

The cited art of record fails to teach an elongated lighting apparatus comprising as least two elongated tubular members which are aligned end to end with a region of separation therebetween, and at least two end caps wherein at least one end cap has a protrusion projecting towards a region of separation, and a flexible interconnector enclosing a region of separation and being illuminated by a light emitting device proximate a protrusion as recited in the claims 1 and 22.

***Conclusion***

6. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter
